Work Experience -

Play-a-thon Web App - Frontend React Developer

Senior Associate Engineer at Ascendion

Hyderabad
Jan 2023 -Current

- Currently working as React Developer on the development of a clone project, aiming to reproduce the pixel perfect user interface (UI), features, and functionality of the Ionic website.
- Worked on popup screens and dropdown menus, sidebar on web pages to make UI functional
- Hands-on experience using Material-UI (MUI) to create user interfaces.
- Worked on enhancing search functionality by using JSON data with autocomplete suggestions.
- Custom Validations & proficient in creating UIs that look and function seamlessly across different devices and screen resolutions.

FIS Global [Client] - Frontend Developer

Associate Engineer at Collabera / Ascendion

Hyderabad
Jan 2022 - Dec 2023

- Leveraged the BOD Framework, which was similar to Material UI, to enhance the user experience.
- Utilized AJAX calls and callback functions to enhance user interactions and implemented robust form validation logic.
- Analysis of XML and JSON data from the old application to identify and recreate missing components for rendering of pages.
- Successfully managed critical modules, consistently delivering high-priority work within established timelines.

Software Engineer at HefShine Softwares

Trainee

Pune, India
Sept 2021- Jan 2022

- Experience trainee with strong foundation in Java, Java Collection & MySQL.
- Angular JS, HTML & CSS
- Version Control - GitHub.

Projects -

DBZ-Gym Website

React.js, Firebase
Github

- In this website we used React.js for the frontend, Firebase Realtime Database for data storage, and Auth0 for authentication. Styling is done using Bootstrap5 and dynamically fetching data from a JSON file, ensuring flexibility and easy updates, rather than hardcoding them.
