ABOUT ME

Skilled **Front-End Web Developer** with 3+ years of experience in the **high-tech and banking sectors**, leveraging hands-on expertise in modern web technologies to deliver pixel-perfect UIs and build robust web applications using **React, JavaScript ES6, and GraphQL**, creating responsive, high-performance solutions that drive business success.

EXPERIENCE

Senior Associate Engineer - Frontend Web Developer

Ascendion Inc. | Cisco Systems, Inc.

📅 Jan 2023 – Present   📍 Pune, India

Project: CXLT – Cisco CX Labs

- Implemented complex UI modules with advanced error validation using **Formik**, dynamically displaying content based on user input to enhance form handling and overall user experience.
- Collaborated with backend teams to integrate modern **GraphQL APIs**, leveraging queries for efficient data retrieval and mutations for dynamic updates for frontend design.
- Developed reusable, pure **React components** to minimize regression risks and promote code maintainability.
- Identified the root causes of errors in hotfix and ad hoc tasks, debugged issues, and implemented fixes within strict timelines to ensure smooth application functionality.
- Partnered with product owners, stakeholders and team members to enforce best practices, mentor junior developers, conduct rigorous code reviews and coordinate with cross-functional teams.

Ascendion Inc. (*Previously Collabera*) | FIS Global

📅 Jan 2022 – Dec 2023   📍 Pune, India

Project: IBS Modernization – Banking application

- Worked on UI development and transitioning a banking app from IE to modern browsers *(e.g. Chrome, Firefox, Edge)*.
- Implemented **critical banking validations and custom data mapping,** optimizing asynchronous data fetching to ensure dynamic and accurate UI displays that met business requirements.
- Enhanced user interactions by utilizing **AJAX calls** and **callback functions**, and developed robust form validation logic to improve data integrity and user experience.
- Successfully managed critical modules, consistently delivering high-priority work within established timelines.

Intern

HefShine Softwares

📅 Sept 2021 – Jan 2022   📍 Pune, India

- Experience **trainee** with strong foundation in **React**, **Angular**, **HTML/CSS** while mastering **Git** workflows on **GitHub**.
- Expanded into **Java**, **Java Collection** & **MySQL**.

TECHNICAL SKILLS

Languages & Frameworks

- React, JavaScript (ES6+), TypeScript, Axios, GraphQL, Angular12+, HTML, CSS

Backend

- REST APIs, Node.js, Express.js

Database

- PostgreSQL, MySQL, Firebase

Management Tools

- Git, Postman, Docker, Vercel, VS Code, Confluence, JIRA, Microsoft Azure

Completed various certifications in Front-End Web Development ○

EDUCATION

B.E. in TSSM College of Engineering.

📅 July - 2020   📍 Pune University

12th *(HSC)*

📅 May - 2015   📍 MH State Board

10th *(SSC)*

📅 June - 2013   📍 MH State Board

PROJECT

DBZ Gym Website   GitHub Link ○

- In this website I've used **React** for the frontend, **Firebase a Realtime Database for data storage**, and **Auth0 for authentication**. Styling is done using **Bootstrap5**.
- Dynamically fetching data from a **JSON** file, ensuring flexibility and easy updates, rather than hardcoding them.

React Projects   GitHub Link ○

- Crafted a robust collection of **React** projects integrated with dynamic **APIs**, showcasing technical expertise in logic building, UI development, and seamless navigation using **Redux** and **React Router DOM**.
